Available with 3 months' notice

Engineering leader and full-stack engineer (8 yrs) building production systems around LLMs and agents. Ship AI product features and drove agentic engineering adoption across my team. Founding-engineer profile: fast, full-cycle, comfortable in ambiguity.

PROFESSIONAL SKILLS

- Systems for AI: event-driven orchestration (RabbitMQ), multi-tenant data isolation, API and schema design — the production plumbing agentic systems run on.
- Technical leadership: managing 2 squads (7 engineers), hiring, mentoring, scaling the team from 0 to 10.
- Product & delivery: full-cycle ownership from concept to production, fast iteration, cross-functional work with product.
- Clean code discipline, SOLID principles, OOP, service-oriented architecture.
- Native French. Fluent English (TOEIC 980). Basic Mandarin and Spanish.

TECHNICAL STACK

AI / Agentic: Claude API, agentic coding (Claude Code)

Core: Vue.js, TypeScript, Node.js, NestJS, Python, GraphQL, MongoDB, PostgreSQL, RabbitMQ, TailwindCSS, REST, Git.

EXPERIENCE

Aug 2021 – present
(current)
~5 years

Mayday – Scale-up, AI Knowledge Management SaaS (acquired by USU GmbH)

Head of Engineering → Tech Lead → Senior Engineer → Full-Stack Engineer

Paris
France

AI-powered knowledge management SaaS. Founding engineer; grew the engineering team from 0 to 10 while the company scaled to 7M ARR and was acquired by USU GmbH, now building toward 9M.

Tech stack:

- Frontend: Vue.js, TypeScript, TailwindCSS.
 - Backend: Node.js, NestJS, GraphQL, MongoDB, PostgreSQL, RabbitMQ.
 - Infra: Kubernetes, Docker, Terraform, ArgoCD, GitLab.
-
- Lead the team owning frontend integration of the product's AI/LLM features.
 - Contributed to the agentic backend powering the product's AI capabilities.
 - Drove agentic engineering adoption: deployed Claude Code across the tech team, defined the security model, and reshaped the delivery workflow.
 - Leading 2 squads (7 engineers); co-defining roadmap with product.
 - Designed single/multi-tenant DB architecture for premium customers.
 - Leading a tech re-org (epic teams + a core run squad) and the engineering OKRs behind it, targeting faster, higher-quality, more predictable delivery.

2019 – 2021
(22 months)

Maiia – Start-up, E-Health

Backend Technical Lead → Full-Stack Engineer

Boulogne-Billancourt
France

Telemedicine and online scheduling SaaS for healthcare professionals.

Tech stack:

- Backend: Java 11, SpringBoot, MongoDB, RabbitMQ, Gradle.
 - Frontend: JavaScript, React.js, Redux/Saga, Next.js.
 - Infra: Kubernetes, Docker, Jenkins, SonarQube, GitLab.
-
- Managed a team of 3 backend developers.
 - Owned technical architecture and data modeling for new features.

-
- Delivered critical features: medical scheduling, payments (Stripe, Algolia).
 - Technical planning and time estimation for the backend team.
 - Mentored incoming backend engineers.

2018 – 2019
(10 months)

Viveris Technologies – *Consulting firm specialized in embedded software*
Embedded Software Engineer / Validation Engineer

Rungis
France

Consulting at Renault and Akka Technologies (autonomous vehicle), then Cobham (aerospace).

- Technical consultant for Renault and Akka Technologies on autonomous vehicle development.
- Wrote test plans and ran functional validation.
- Developed unit tests in C on the RTTR platform at Cobham.
- Validated functional and technical specifications in a safety-critical environment.

SIDE PROJECTS

Portfolio Assistant — single-page Nuxt 3 site with a built-in AI chatbot. Nitro backend on the Vercel AI SDK: streaming responses, my knowledge base injected into the system prompt, pluggable LLM provider (Groq / Gemini / Ollama), one-deploy on Vercel.

husgit — Git workflow CLI, published on npm.

@glassui — glassmorphism UI library: Vue components on a framework-agnostic CSS core (tsdown, pnpm workspaces, Turborepo).

INTERESTS

- NBA fan; recreational basketball player.
- Board & snow sports: skiing, snowboarding, wakeboarding, stand-up paddling.
- Loves traveling and exploring countries through their food culture.
- Cooking for the family; video games.
